Language

- English
- Tagalog
- Waray-Waray

Expertise

- Web Development
- UI/UX Design
- Database Design and Management
- Leadership

Project Experience

E-Commerce Web Application (Ekubo Marketplace)

Designed and developed a web-based e-commerce system using Django, implementing user authentication, product management, and real-time notifications between clients and sellers.

Real-Time Filipino Sign Language Translator

Developed a real-time Filipino Sign Language translation system using Django as the backend with WebSockets for live communication, and Flutter for the mobile frontend to deliver seamless, real-time user interaction.

Web-Based Inventory Management System with POS

Built a Django-based inventory management system with an integrated Point of Sale (POS) module that automatically adjusts stock levels after each transaction. The system includes product, supplier, and category management features, as well as sales tracking with daily, weekly, and monthly visual analytics implemented using JavaScript.

Education

Biliran Province State University

Bachelor of Science in Computer Science
2022 - 2026

Caibiran National High School

2016 - 2022
